

Using Your Microphone

Click on the "start my camera and voice" to enable microphone talking.

Hold down the "Talk" button when you want to talk.
Or...

Click the "Hands-free" button to keep "Talk" enabled without holding down the button. This is the most common talk method

You do not have to start the camera and voice to hear the tutor speaking. You only need to turn it on if *you* plan on using a microphone.

If you cannot hear the tutor speaking check the volume buttons on your computer, speakers, and/or headset.
